PROFESSIONAL PROFILE

Full-Stack Developer with 7 years of progressive experience (including training and professional stages): I started as an intern/junior in 2019 and **have held** roles of high technical responsibility (Senior/Consulting) **since 2022**. (Senior/Consulting). Specialized in business automation, ERP system integration (Odoo) and cloud architectures. I am characterized by solving complex problems in short times, working with multicultural teams (China, Japan, Argentina). Focused on clean code, performance, and measurable results.

TECH STACK (43 TECHNOLOGIES)

Frontend: HTML5, CSS3, JavaScript, React, Next.js, Vue.js, Angular, Tailwind CSS, Bootstrap

Backend: Python (FastAPI, Flask, Django), PHP, Node.js, Java

Databases: PostgreSQL, Firebase, SQLite, MongoDB, MySQL, Supabase

Cloud & DevOps: Vercel, Cloudflare, AWS, GCP, Azure, Docker, Kubernetes

Tools & Testing: VS Code, Three.js, Figma, Postman, Git, GitHub, Linux, npm, Nginx, Redis, RabbitMQ, Selenium, Jenkins, Grafana, Prometheus

PROFESSIONAL EXPERIENCE

SENIOR EXPERIENCE / CONSULTING (2022 – Present)

HUIZHIYUN TECHNOLOGIES S.A. (汇智云科技股份有限公司) (China) · Consulting Project

Cross-Border Automation Engineer | Jul 2026 (3 weeks)

- Contracted to develop a multilingual invoicing pipeline for China-Latin America trade.
- Implemented extraction engine from Excel/CSV with mixed encodings (UTF-8, GBK, GB2312) using Python, pandas and openpyxl, processing invoices with Chinese characters without data loss.
- Designed an automatic currency conversion system (CNY, EUR, USD) with real-time rates.
- Generated executive reports in PDF and Excel in 3 languages (Chinese, English, Spanish) with ReportLab and CJK fonts.
- Collaborated with a bilingual team in Shenzhen to understand customs and logistics flows.

Stack: Python, pandas, openpyxl, ReportLab, chardet, PowerShell.

CODEX STUDIO VE (Venezuela) · Agency & Personal Branding

Founder & Chief Technical Officer | Dec 2025 – Present

- Developed and implemented a full-stack commercial control system that automates inventory flows for SMEs, reducing waste and improving operability by 40%.
- Modernized and migrated database infrastructures for local clients, reducing processing times by 40%.

YERBATERA DEL SUR S.A. (Yerbatera del Sur Co.) (Argentina) · Consulting Project

Odoo Developer | Nov – Dec 2024 (3 weeks)

- Hired to implement custom inventory and billing system in Odoo.
- Centralized control of products, shipments, suppliers, and business operations in a single system, reducing billing errors by 30%.

Stack: Odoo, Python, PostgreSQL.

APPLIED CYBERSECURITY LABORATORY

Security Researcher (Applied Research Role) | 2022 – 2023

- Coordinated security incident response in simulated environments.
- Implemented secure corporate account recovery protocols using OSINT analysis.
- Performed defensive research and vulnerability analysis on controlled systems.

MUSASHI TRANSPORT CO., LTD. (武蔵運輸株式会社 / Transportes Musashi S.A.) (Japan) · Consulting Project

Software Developer | Apr – Jun 2022 (3 months)

- Developed inventory management system and data automation in collaboration with a team of accountants.
- Automation of 50% of accounting report flows using Python scripts and custom SQL queries, reducing monthly close time from 5 to 2 days.

Stack: Python, SQL, Excel Automation.

EARLY / FORMATIVE EXPERIENCE (2019 – 2021)

SMART HOME ZHIRAN S.A. (杭州知然智能家居有限公司 / Hangzhou Zhiran Smart Home Co., Ltd.) (China)

Junior Web Developer | Mar 2019 – May 2021

- I created and designed the main Landing Page and the E-commerce platform of the company.
- I managed and maintained, together with a team of programmers, web platforms based on Odoo and WordPress.
- Optimized online store load times by 25% by customizing modules and cache settings.

Stack: WordPress, Odoo, HTML, CSS, JavaScript, PHP.

PERSONAL AND RESEARCH PROJECTS

♦ TempusDB – Research Project

<https://github.com/sebastiancoronadev/TempusDB>

Database engine for time series developed from the ground up. Implements compression algorithms for efficient data reduction and high-volume processing. Key technologies: Rust, Go, LZ4 compression algorithms.

♦ Typeon – Internal Framework (PoC)

<https://github.com/sebastiancoronadev/Typeon>

Framework for scalable REST APIs. It integrates distributed cache and symmetric encryption with AES-256-GCM and ECDH. Key technologies: TypeScript, Node.js, Redis.

♦ HSTP (Cybersecurity) – Academic PoC

<https://github.com/sebastiancoronadev/Hardened-Secure-Transport-Protocol>

Secure transport protocol with identifier validation using Luhn's algorithm, designed to minimize exposure of sensitive data. Key technologies: Cybersecurity, cryptographic validation.

CONTINUING EDUCATION AND TRAINING

Los Pinos Educational Unit | Guacara, Venezuela

Bachelor of Science | 2026 (Final year)

Self-Taught Technical Training | 2018 – Present

Specialization in:

- Software Architecture and Full-Stack Development
- ERP (Odoo) and Business Automation
- Cybersecurity and Safe Transportation Protocols
- Cloud Computing (AWS, GCP, Azure)

Note: I started my career as a self-taught developer at the age of 15, combining high school studies with real projects and international internships.
